Space Chamber

plus[®]

Designed to deliver medication into the lungs enabling patients with asthma and COPD to take control

Cross Valve Technology™

- Very low resistance
- Flow direct from inhaler
- The Cross Valve allows one way flow for ease of use

Transparent polycarbonate chamber

Clear view of respiratory valves and their movement enables the confirmation of correct inhaler operation and usage.

Universal inhaler base

Compatible with all types of metered dose inhaler ('puffer'). Does not easily detach when removing the 'puffer'.

Multi-purpose mouthpiece for standard face masks

22 mm outer diameter can be used with any international standard facemask. 15 mm inner diameter can be attached directly to a tracheostomy or endotracheal tube.

Compact size

Conveniently fits into school bags, handbags or briefcases to allow easier storage and handling.
